

SECURITY starts at the PERIMETER of your property

AUTOMATIC GATES, BARRIERS & ACCESS CONTROL

There are so many properties here in Scotland where the driveways are, frankly, an **INVITATION** to the intruder — gates open all day and all night, or no gate at all. Yes it is an **inconvenience** to get out of your car in the pouring rain to open and shut the gates. Plus your driveway may open into a **busy road** — and you simply could not consider stopping the car, leaving the engine running,, taking safety risks, causing a traffic jam. Then again, the gates may be **so heavy** and badly maintained that you don't even know whether they work any more.

Well that's where **CENTURION** can help you by automating your existing gates or installing a brand new set to match your property. With remote control operation at the **touch of a button** they will open and close **effortlessly**. Inconvenience will be a thing of the past. You will also ensure that the kids and the dogs are kept in, while the burglars are kept out.

And the same button can operate your **garage door** too!

CONFIDENCE and PEACE OF MIND from your GARAGE DOOR

RESIDENTIAL GARAGE DOORS

Most homeowners don't realise that the garage can be one of the **most vulnerable** areas of their property.

An old, poorly-fitted, ill-maintained garage door will take a **seasoned burglar no more than a few seconds** with a screwdriver to gain entry. And if your garage is integral to your house — bingo — Christmas has come early for him this year!

But with a **High-Security GARAGE DOOR** from **CENTURION** your property is so secure that those first few seconds will be enough to convince him that you are not the ideal victim.

We can tell you what the jargon really means. We can advise you on terms like "Up-and-Over", "Roller" and "Sectional" garage doors. We can also tell you whether or not your **existing garage door** can be converted for remote-control operation.

We can also link your automatic garage door to your **automatic gates, access control devices** or **anti-theft alarm system**.

SECURITY on the OUTSIDE

Perhaps you have no driveway, no gate or it's simply not high enough—even after automation.

Besides, despite having a burglar alarm installed you've still been broken into twice already!

It doesn't have to stay that way. **CENTURION** can provide you with beautifully-finished external Security Shutters to match your property—ensuring it is **protected 24/7**. And they can also be **remotely controlled**. Fully **LPCB-rated** our external Security Shutters have been designed to make rogue entry impossible. And what's more they can also be linked to your existing alarm system.

CONFIDENCE on the INSIDE

However you may not like the idea of having shutters on the outside of property. Perhaps you're in a conservation area, or the building doesn't lend itself to the facility.

No problem.

Let's do it on the INSIDE with our range of expertly manufactured **Security Bars and Grilles**. When you are away they cover the whole window or door. But when you're at home they can be pulled back, and hidden away behind the curtains.

PEACE OF MIND via ACCESS CONTROL & CCTV SURVEILLANCE

To control who gets into, and monitor those who are inside, your property, **CENTURION** supply a wide range of **Audio and Video Access Control** devices, **Gate/Door Entry Systems** and **CCTV Monitoring/Recording**.

Entry/Access systems can be programmed with your own personal settings.

CCTV systems can be designed to your own specification and completely self-contained. Alternatively, they can integrate with your home TV or VCR equipment — or even your PC.

Total flexibility to suit your requirements and your budget.
