

# OptiGuard System

## Vandal-Protection Window Screens

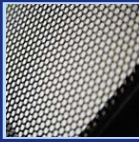

### BENEFITS

- **Quick payback** – once fitted most customers find OptiGuard repays the investment many times over by reducing vandalism, breakage and burglary.
- **Inobtrusive appearance** – from a distance OptiGuard resembles tinted glass but up close provides a strong visual and physical deterrent.
- **Perforations provide maximum vision and light** - whilst retaining the strength of the screen.
- **Cover strip protects fixings from attack** - unlike similar products the aluminium cover strip is firmly fixed and does not easily become detached.
- **Polyester powder coated in a wide choice of colours** - to give a long lasting finish and co-ordinate with décor.
- **Planning permission** - is generally not required when OptiGuard is face fixed.

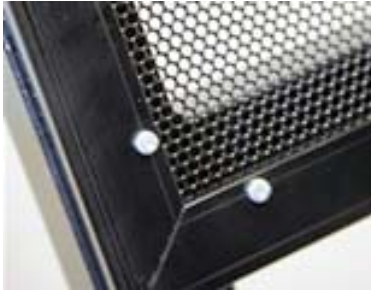

Seriously Strong Security

## VANDAL-PROTECTION WINDOW SCREENS

### CONSTRUCTION

Construction	Galvanised steel
Thickness	1.5mm
Perforation diameter	4mm
Pitch	5mm
Visibility	60%

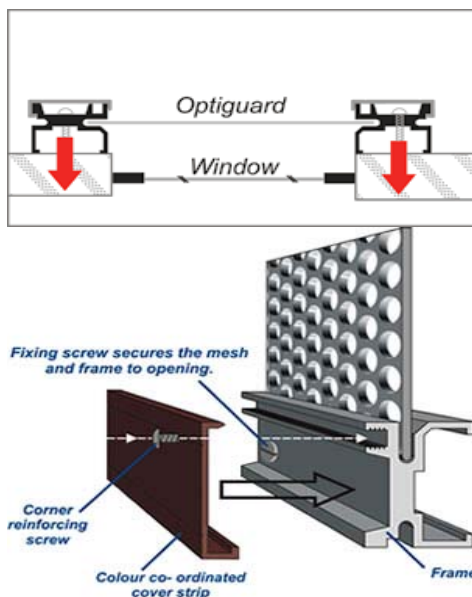

OptiGuard is constructed from 1.5mm galvanised steel sheets with fine 4mm diameter perforations and a 5mm pitch to give and excellent 60% visibility.

The sheets are fully enclosed in an aluminium frame with a reinforced aluminium cover strip to protect the fixings.

### INSTALLATION

OptiGuard is secured to the opening by a frame designed to accept a variety of fixings. For maximum protection it is recommended that the barrier is face fixed. The unique aluminium cover strip is then placed over the frame to protect the fixings. If reveal fixing is the best option a reveal fixing kit is required.

For maximum protection OptiGuard is face fixed. Sizes range from 100mm – 2500mm wide and 100mm – 1200mm high. For larger sizes a panel joining kit is required.

### COLOURS

OptiGuard is available in a wide range of durable polyester powder-coated colours to give OptiGuard a versatile and attractive finish.
