

## SECURITY starts at the PERIMETER of your Premises

**AUTOMATIC GATES,  
BARRIERS & ACCESS CONTROL**

Many businesses now integrate their **Health & Safety** with their Security requirements. This arises from one simple fact: unauthorised entry to insecure premises (or yard areas) also creates a significant Health & Safety issue — and one which could **cost your business dearly**.

That is why you need to begin your security considerations at the proverbial “factory gate”—in other words, the **PERIMETER of your premises**.

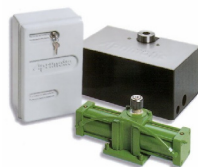

A Security Audit from **CENTURION** will identify your requirements from the outside, in.

The solution may range from a simple set of Parking Bollards to a fully-integrated Traffic Management System using our range of Automatic Gates or Barriers operated via Access Control devices and monitored via CCTV equipment and/or your Computer System.

Whatever your business' size or requirements you will receive the same level of **professional advice**.

## CONFIDENCE on the OUTSIDE

**PHYSICAL &  
ELECTRONIC SECURITY**

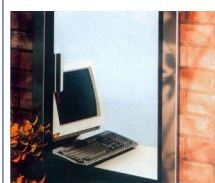

The best way to secure your premises, particularly on industrial estates, is by making it **impossible** for thieves to gain entry. **Don't just assume** that your “NACOSS-approved” **alarm system** will do the trick — our police forces are generally overstretched and it **will take them time** to attend. Meanwhile the burglar may already have broken in, stolen valuable assets and caused the usual mayhem associated with the event. Seldom does your insurance fully cover the “hassle” cost.

**CENTURION** can provide you with **LPCB-rated external Security Shutters or Grilles** to match your premises—ensuring it is **protected 24/7**. These can be **manually** operated, **automatic, remotely controlled** or linked to your **existing alarm system**.

## PEACE OF MIND on the INSIDE

Sometimes it is neither possible nor desirable to fit external shutters or grilles. No problem. We can secure your premises **from the INSIDE** with our range of expertly manufactured **Security Grilles**.

These products can **match the internal décor**, and be opened during working hours for ventilation — although they hardly affect the incoming light.

**SECURITY and CONFIDENCE at  
your DOOR ACCESS POINTS**

Most business owners/managers don't realise that the workshop door can be one of the **most vulnerable** areas of their premises.

An old poorly-fitted, ill-maintained shutter door will take a **seasoned burglar no more than a few minutes** with a screwdriver to gain entry. And your alarm system won't necessarily deter him either.

But with a **High Security Door** from **CENTURION** your premises are so secure that those first few minutes will convince him to move on to an easier target.

We can advise you on Roller Shutters, Sectional Overhead Doors, High-Speed Doors, Fire Doors, PVC Strip Curtains and Pedestrian Access Doors. We can also tell you whether or not your **existing doors** can be converted for electric or remote-control operation.

Additionally we can link your automatic doors to your **automatic gates/barriers, access control devices, anti-theft alarm system or computer system.**

And...we're **just a phone call away.**
